

MY PLAY DOUGH SHEET

Using your white playdough can you create the correct moon phase shapes on the chart below? Label the phases using your pencil!

PLAY DOUGH RECIPE

Ingredients

- 4 tbsps. flour
- 1 tbsps. salt
- 1 tsp oil (any will do)
- 2-3 tbsps. warm water (hand hot from the tap is fine)

Method

1. Add the flour and salt to your bowl and mix to combine.
2. Add the oil.
3. Add 2 tbsps of water then mix.

The mixture should start to come together into a dough at this stage. If it is still too dry add the 3rd tbsps. of water, a little at a time. If it is too wet, sprinkle in some more flour until you reach the desired consistency. Once it begins to form a dough use your hands to finish kneading it.

Store in an airtight container or bag when you have finished playing!. The dough should last up to a week when stored correctly.
